Description

Description

Is used wherever WAS 10. 500 is used. WAS 10. 500 already has corrosion protection that provides adequate corrosion protection in over 99% of all applications. In a few cases, however, additional corrosion protection may be necessary. If particularly rust-sensitive parts are washed, such as grey cast iron or low-alloy steels.

Advantages

- Liquid concentrate on an aqueous basis
- no powder gentle on the material
- suitable for sensitive surfaces / workpieces (painted surfaces, brass, copper, zinc, nickel, chrome, aluminium, plastics of all kinds)
- Environmentally friendly and user-friendly
- silicate-free

Recommended dosage

Concentration: 0.5 - 1% (based on the bath volume). For example, if your automatic washing machine contains 110 litres(IBS-MAXI 78), you will need to add 0.55 - 1.1 litres of IBS corrosion protection concentrate.
