Description

Applications:

Adapted for use in all standard floor cleaning machines. Effective when used in high-pressure/steam jet cleaning processes. Best cleaning results also with brush cleaning and wiping.

Areas of application:

- General basic and industrial cleaning
- Industrial, hall and workshop floors
- Sealed and coated floors
- Concrete and smooth floor surfaces
- Ceramic floors, tiles
- Tunnel cleaning (tunnels, bridge subways and viaducts - including walls, floors/track)
- Hall and workshop walls

Soiling:

- Tyre rubber abrasion (forklift trucks)
- Stubborn deposits
- Drilling and cutting oils, deposits from cooling lubricant mist
- Oil and grease residues, soiling of all kinds
- Dust, environmental and everyday soiling
