Description

Description

The IBS ultrasonic cleaner USW-39 workshop version is very easy to use. The parts to be cleaned are simply placed in the basket and the cleaning concentrate is added to the bath liquid. For ultrasonic cleaning, we recommend our IBS special cleaner WAS 10.500 (for oil and grease soiling) or our WAS 20.100 (for combustion residues, coking, pigments). The appliance is then switched on and the cleaning process starts. The cleaning time depends on the degree of soiling of the parts. As a rule, however, it only takes a few minutes.

The IBS ultrasonic cleaning device USW-39 workshop version is suitable for cleaning a wide variety of tools and components. These include, for example

- Screws, nuts, fasteners
- tools
- Small parts such as electronic parts and components

The advantages of the IBS ultrasonic cleaning device USW-39 workshop version at a glance:

- Thorough and gentle cleaning of tools and components
- Robust stainless steel construction
- Basket and lid included in the scope of delivery
- Simple operation
- Easy cleaning and care of the device

Technical data of the IBS ultrasonic cleaner USW-39 workshop version:

- Capacity: 39 litres
- Ultrasonic peak power: 1520 W
- Heating power: 1.6 kW
- Internal dimensions (L x W x H): 1000 x 200 x 200 mm
