Description

Description

The IBS parts cleaning device type F2-D was specially developed for manual brush cleaning of parts contaminated with oil and grease using cold cleaning agents (petroleum-based hydrocarbon mixtures).

This mobile device with wheels (sack truck principle) and lid is suitable for mobile use in changing locations. With a medium-sized work surface (790 x 490 mm), a working height of 920 mm and a load capacity of up to 100 kg, this brush washbasin is suitable for cleaning medium-sized and heavier parts.

The sturdy powder-coated sheet steel construction and the robust galvanised slatted grating guarantee a long service life, while the lower drain and the sloping drain ensure that everything flows back into the drum and the cleaner cannot overflow.

The convenient and safe foot switch technology is user-friendly and easy to operate.

The unique IBS special pump is the centrepiece of the IBS parts cleaners and is designed for use in IBS parts cleaners. The pump is self-priming, unpressurised and absolutely trouble-free and maintenance-free.

The complete IBS pump set type F/F2 is included in the scope of delivery
