Description

Applications:

Optimally formulated for use in spray and wipe applications. Can also be used for floor cleaning and in aqueous brush-washing stations.

Also ideal as a non-marking alternative to conventional brake cleaners – for the safe cleaning of brakes, engines, gearboxes, power units and hydraulic components.

Areas of application:

- suitable for general surface cleaning across all sectors
- all types of plant and equipment, small and large machines, tools and machine parts
- also suitable for general maintenance cleaning (floors, walls)
- ESD protection zones and on general ESD surfaces (with ESD certification)
- cleans glass surfaces without leaving streaks

Types of soiling:

- oil and grease
- everyday and environmental soiling
- stubborn deposits, resinous build-up
- clumped grease, hydraulic and engine oils
- soot, grinding and polishing dust
