Description

Description

The IBS ultrasonic cleaning device USI-13 is very easy to use. The parts to be cleaned are simply placed in the basket and the cleaning concentrate is added to the bath liquid. For ultrasonic cleaning, we recommend the IBS special cleaner WAS 10.500 or WAS 20.100 . The device is then switched on and the cleaning process starts. The cleaning time depends on the degree of soiling of the parts. As a rule, however, it only takes a few minutes.

The IBS USI-13 ultrasonic cleaning device is suitable for cleaning a wide variety of tools and components. These include, for example

- Screws, nuts, fasteners
- Tools (pliers, screwdrivers, saws, etc.)
- Small parts such as electronic parts and components

The advantages of the IBS ultrasonic cleaning device USI-13 at a glance:

- Thorough and gentle intensive cleaning of tools and components of different geometries, types and sizes
- Robust stainless steel construction
- Basket and lid included in the scope of delivery
- simple operation
- Easy cleaning and care of the appliance

Technical data of the IBS ultrasonic cleaning device USI-13:

- Capacity: 20 litres
- Ultrasonic peak power: 1200 W
- Heating power: 0.8 kW
- Internal dimensions (L x W x H): 325 x 275 x 200 mm

Product information

Bath contents:	20 l
External dimensions WxDxH:	365x340x390 mm
Load capacity:	10 kg
Ultrasonic power:	1200 W
