Description

Description

This special cleaner based on vegetable oil ester is suitable for manual cleaning of oil and grease soiling on metal parts and surfaces. It can be used in a brush-wash process, for surface degreasing and in an immersion or wiping process.

Advantages

- The remaining cleaning oil film ensures excellent rust protection - no metal corrosion (ideal preservation - intermediate storage for several days possible).
- It evaporates slowly and evenly.
- Excellent cleaning effect: removes even stubborn, old and resinified oil and grease stains, as well as tar
- The cold cleaner has a high flash point (> 101 °C), which ensures a high level of safety and occupational safety. Does not fall under the VOC directive.
- It is environmentally friendly and cost-effective as it can be used without heating.
- The cold cleaner is dermatologically safe and has the "Low-emission product" seal of approval from BG ETEM.

Areas of application

Repair, maintenance and servicing workshops of all kinds (agricultural machinery, construction machinery, rail, industrial trucks, lorry and car workshops as well as in machine and tool construction).
