Overview

IBS Automatic Parts Washer MINI 60

Product number: 2129903

06701-9383-0
info@ibs-scherer.de

Description

The soiled items to be cleaned are placed in the rotating wash basket and the lid is closed. After setting the desired washing temperature and time, the appliance is switched on and the washing solution is heated in the tank. When the appliance is closed, the basket rotates around its own axis at a constant speed. The pump units draw the wash liquor from the wash tank and convey it through 6 stainless steel nozzle pipes with overlapping flat jet nozzles. The items to be cleaned are intensively blasted with hot suds from all sides while the basket, which is driven by a jet stream, rotates evenly.
Once the cleaning process is complete, the appliance switches off automatically.

Advantages

- 1 pump arranged horizontally
- Litre capacity: 70 l/min
- 3 three-dimensional stainless steel nozzle pipes
- Robust stainless steel design
- Additional small parts cleaning basket made of stainless steel (Ø 170 mm)
- Rotating stainless steel washing basket, driven by water jet
- vapour extraction
- Sieve plate with stainless steel filter inlets above the wash tank
- Low water cut-out

Product information

Basket diameter:	600 mm
Connection:	3,55 KW / 230 V / 50 Hz
External dimensions WxDxH:	945 x 830 x 1025 mm
External dimensions WxDxH (open):	945 x 830 x 1640 mm
Load capacity:	100 kg
Pump pressure:	2,2 bar
Spray volume:	4.200 l/h
Useful height:	380 mm
Weight:	60
