Overview

IBS ultrasound device USW-90

Product number: 2320008

06701-9383-0
info@ibs-scherer.de

Description

The IBS ultrasonic cleaning unit USW-90 workshop version is very easy to use. The parts to be cleaned are simply placed in the basket and the cleaning concentrate is added to the bath liquid. For ultrasonic cleaning, we recommend our IBS special cleaner WAS 10.500 (for oil and grease soiling) or our WAS 20.100 (for combustion residues, coking, pigments). The device is then switched on and the cleaning process starts. The cleaning time depends on the degree of soiling of the parts. As a rule, however, it only takes a few minutes.

The IBS ultrasonic cleaning device USW-90 workshop version is suitable for cleaning a wide variety of tools and components. These include, for example

- Screws, nuts, fasteners
- tools
- Small parts such as electronic parts and components

The advantages of the IBS ultrasonic cleaning device USW-90 workshop version at a glance:

- Thorough and gentle cleaning of tools and components
- Robust stainless steel construction
- Basket and lid included in the scope of delivery
- simple operation
- Easy cleaning and care of the device

Technical data of the IBS ultrasonic cleaner USW-90 workshop version:

- Capacity: 90 litres
- Ultrasonic peak power: 2400 W
- Heating power: 1.95 kW
- Internal dimensions (L x W x H): 600 x 500 x 300 mm

Product information

Bath contents:	90 l
External dimensions (LxWxH) without handles/ball valve:	640x540x530 mm
Load capacity:	10 kg
Ultrasonic power:	2400 W
